How much the falling off in the Demo cratic vote in this and other States is due to the loosened hold of the party managers upon our slien population, it may perhaps be difficult to decide. But it is certain first, that there have been very few naturalizations this year, the right of suffrage not being considered by aliens an equivalent for the "privilege" of bearing arms.— Hence this source of accessions to the Democratic party is cut off, and as there is always a loss from desertions when aliens beways a loss from desertions when sliens become better acquainted with our politics, and learn that Democracy has a conventional meaning in this country entirely different from its significance in Europe, the Democratic party is really undergoing an alarming depletion. The accession of for-silized Whigs by no means equals the loss from this source alone. But above all this the disloyal attitude of the party-not so much here as in other States has scaled

its death warrant.
The managers will work desperately to recover lost ground, and make a stand in the next Presidential campaign, but only a thorough reorganization and expurgation of all disloyal elements can give them. a show for success. In fact their less chance is to endorse the policy of the Prescureding short time, by a found they were decreased, and that the POISON has, by the use of "crowners Astronomy that the over tend of the rud-suggravated form, and perhaps after Marriage. icals will commit them to an organised opposition Boston Jour.

A Compliment.

He has, as a general rule, spoken in terms of justice and decorum of his political opponents in this country, when he has found occasion to allude to them; and in the zeal with which ne has sought to turn the tide of prejudice in favor of the Umon cause, we recognize the aparit of a patriot. Would to God that always, as in his case, party antipathies could cease at the water a edge, and that every American who goes abroad would feel that he has but one country, and that all its citizens are bound to him by the ties all its citizens are bound to him by the ties of a common patriotism f.
